***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: Claims 1, 3-16, and 21-25 are allowed over the closest reference, Strait *et al.* (U.S. 5,945,134).

The present invention is drawn to a two-part sizing composition comprising a size composition and a binder composition including a copolymer formed from maleic anhydride and butadiene or a derivative of said copolymer, said derivative being selected from the group consisting of an anhydride derivative, an acid derivative, a half-ester derivative and a half-amide derivative.

Another aspect of the invention is drawn to a two-part sizing composition comprising a size composition and a binder composition including a copolymer formed from maleic anhydride and ethylene-ethylacrylate or a derivative of said copolymer.

A further embodiment of the invention is reinforcing fiber product comprising one or more strands of reinforcing fiber material coated with the two-part sizing compositions described above.

Strait *et al.* discloses a process for coating glass fiber with a two-part sizing composition comprising a partial ammonium salt of butadiene-maleic anhydride copolymer. The reference does not teach or fairly suggest use of non-derivatized butadiene-maleic anhydride copolymer or anhydride, acid derivative, half-ester, or half-amide derivatives of butadiene-maleic anhydride copolymer. Also, the reference does not teach sizing compositions comprising a copolymer formed from maleic anhydride and ethylene-ethylacrylate or derivatives thereof.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
